PROFILE

Final-year Bachelor of Game Design and Development student at Macquarie University (completing 2026) with a shipped credit as Level Designer and Programmer on Bomb Slime (itch.io, October 2026). I design layout-first on paper, build and tune in-engine, and change levels based on playtest evidence. Multiple game-jam results, including two awards, show I can design quickly to a theme and a constraint, and two years teaching children to code at Code Camp give me first-hand insight into how young players learn, fail and try again.

SHIPPED TITLE

Bomb Slime — Level Designer & Programmer | JARL (formerly Team Haven) **2026 · released 27 Oct 2026**

Team of five; 2D precision platformer in Unity 6, free on itch.io (browser and Windows). Two-semester degree project, from prototype to public release. pengzzzccc.itch.io/bombslime

- **Level design:** authored the original eight-room Level 1 layout on paper, with every room labelled with the mechanic it teaches; ran trap, obstacle and finishing passes on Mine Caves 1 and 3; built Mine Cave 2's moving platforms, crushers and laser and redesigned its first half, reworking sections playtesters rated poorly.
- **Playtesting:** ran the 28 October hybrid group playtest (downloaded build plus itch.io browser build: 16 of the project's 20 survey responses, 19 opt-in session recordings); built the WebGL browser build used for the September Alpha playtests.
- **Evidence-led iteration:** owned the opening-difficulty risk raised at Alpha (3 of 4 testers found the opening too hard); by release, 15 of 20 testers rated Mine Cave 1 easy or just right.
- **Production:** 141 logged hours and 72 non-merge commits (Git/GitHub); merged the integration branch into the level team's branch before the Alpha; added checkpoints, a capacity pickup, a run timer, the bomb-inventory display and credits features.
- **Showcasing:** ran the game's station at a Sydney Games Festival showcase (15 Oct 2026). Earlier in 2026: level design lead on the team's prototype, *Inkform*.

GAME JAMS

Winner: "Best use of constraint & theme"

Space Kitchen: Starberry Hell

MACS/MAGE Jam Finale 2026

Leader, designer and main developer

A 2D point-and-click cooking game: experience cooking in outer space with zero gravity.

Top 16% overall

Pay or Decay

GMTK Game Jam 2026

Leader, designer and main developer

A 2D Unity game where the player is a debt collector for the most impatient boss in the city; a Boss Patience Metre replaces the usual countdown timer. Started using Miro for visual planning and collaboration.

Winner: "Best Use of Theme"

FOCUS!

Game Jam 2025, Macquarie University

Designer/developer

Built in Unity and C#; concept and visuals mapped in mind maps.

Jam entry

IAmNesia

Game Jam 2026, Macquarie University

Leader, designer and main developer

A 2D visual-novel role-play puzzle: Nesia wakes with no memory inside an empty storybook, carrying only a magic pen, and sets out to uncover her past.

Lesson: I tried to build every mechanic I could think of instead of refining one. It didn't place, and it taught me to pick one mechanic and polish it.

EDUCATION

Bachelor of Game Design and Development | Macquarie University — 2024 – 2026
Final-year team project: prototype (*Inkform*) through greenlight, Alpha, beta and public release of *Bomb Slime*; proposals, design documentation, playtest reports and a release grant proposal.

Diploma of Information Technology | Macquarie University — Completed

WORK EXPERIENCE

Chess Coach | Sydney Academy of Chess — Apr 2026 – present

- Coach students in chess strategy, tactics and game analysis, breaking complex ideas into clear, step-by-step lessons matched to each student's level.

Teacher | Code Camp — Oct 2024 – present

- Teach children to code through engaging, creative projects, building critical thinking and problem-solving; adapt explanations to each child's attention and pace.

English Tutor (online) | Zoom & Microsoft Teams — Aug 2023 – present

- Personalised remote lessons in reading, writing, speaking and listening; clear written and spoken explanation for learners at different levels.

Retail Sales Assistant | Quoc Thinh Construction and Trading Limited Company — Nov 2020 – May 2022

- Consistently met and exceeded KPI targets through customer communication.

SKILLS & TOOLS

Design	Paper prototyping, level layout and teaching order, trap and obstacle passes, player-experience goals
UX	Running remote and in-person playtests, surveys, death heat maps and session recordings
Engine	Unity 6 (2D, URP), C#, WebGL builds; Unreal Engine: eager to learn
Workflow	Git, GitHub, Git LFS, Jira, Miro, Discord, Google Forms, PowerPoint

VOLUNTEERING & CERTIFICATES

- Event clown and balloon twister, Nu Cuoi Yeu Thuong (Happy Smiles) Charity Group, HCMC (2020)
- Balloon-twisting instructor, BA Adventure season 3, HCMC International University (2015–2020); volunteer, CoNgot (Sweet Grass) Charity Group (2022–2023)
- Working With Children Check, RSA, RCG (Service NSW); MOS PowerPoint (2020); IELTS 6.5 (2023)
